FROM:

[redacted]
4C System Administrator, DDA/OS

25X1

SUBJECT: Requests for Access to 4C

1. IOC (Initial Operation Capacity) of the 4C System is scheduled for March 1983 on a stand-alone computer system. The security requirements of the 4C System require dedicated terminal lines to that computer system. Surveys were conducted during the design phase of system development for the purpose of determining the need for access to 4C at IOC. As a result of the surveys conducted computer hardware requirements were determined and system configuration was accomplished. Consequently, access to the 4C System, at IOC, must be limited to those offices requiring access at that time.

2. Therefore, it is requested that each Directorate ADP Control Officer inform all component offices under his jurisdiction to forward to me (at room 5E-11 Headquarters, [redacted]) all requests for terminal access to the 4C System. Each request will be reviewed for determination of need. Those requests which are approved will

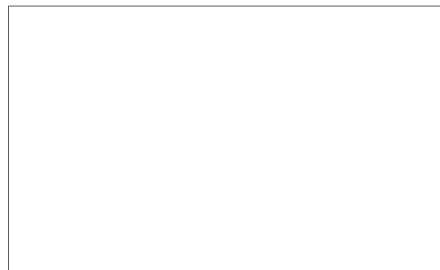

[redacted] 25X1

~~CONFIDENTIAL~~

CONFIDENTIAL

be forwarded to the Office of Data Processing for action. Those requests not approved will be returned to the originating office. It should be mentioned, too, that all requests forwarded to this office must be approved by the originating component finance office to cover costs that might be incurred for access to the 4C System.
